

Plastic bags are very bad for the environment as they litter our environment and kill land animals and endangered marine life.

*We decided to create the **Trash Bag Dress**.*

We just needed a few trash bags and a lot of creativity!

First we had to shop for supplies.

We needed some colourful trash (garbage) bags, and some crafty materials - staplers, scotch tape, glue, pins and scissors, a base for the dress – dummy.

We tape together some pink trash bags and made a petticoat.

We tried to create a nice top, attaching with pins.

We used bags of the different pink colour for making the upper skirt. It had to be bigger and more beautiful.

Some girls made roses for the dress decoration, which took a total of six hours to make. We created rose balls using larger pieces of the trash bags.

Then we attached each rose across the bottom of the skirt. We used staplers and scotch tape.

The skirt was very big and rather heavy, we put it on the dummy.

The boys decided to add a hat with roses.
